ATO on AWS Pilot

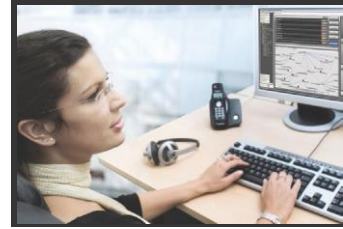

Kratos, SmartSheet, and AWS

Pilot Overview

Kratos CyberSecurity Services is the information technology and cybersecurity Group within Kratos Defense & Security Solutions, Inc., a leading national security and information technology solutions provider. Kratos has the full range of skills needed to assist cloud environments seeking or maintaining a FedRAMP Authority to Operate (ATO).

Smartsheet is a Software as a Service (SaaS) application for collaboration and work management that is developed and marketed by Smartsheet Inc. Smartsheet was selected as the pilot for AWS's program ATO on AWS. The program was announced November, 2018

<https://aws.amazon.com/blogs/publicsector/announcing-ato-on-aws/>

Highlights

- Kratos worked with Smartsheet, Anitian, and AWS
- Kratos provided critical FedRAMP advisory services to both Smartsheet and Anitian
- Created and supplied the entire FedRAMP documentation package within 5 weeks
- ~40% timeline reduction for FedRAMP documentation creation
- Standardized process created by Kratos to repeat efforts for future clouds

Kratos Key Features

- Provides a streamlined and accelerated FedRAMP package building process
- Among the most experienced FedRAMP Third Party Assessment Organizations (3PAO)
- Offer four unique services: FedRAMP assessments, Advisory Services, Penetration Testing, and Continuous Monitoring
- We work with any size of cloud, from the largest to the smallest
- Deliver established and repeatable services that enable reduced timelines and accelerated ATOS

Cloud Customers

For more information about our capabilities and how our work with ATO on AWS can provide your cloud with reduced timelines and increased reporting accuracy, please contact us.

The Challenge – Accelerating the FedRAMP ATO Process

The Federal Risk and Authorization Management Program (FedRAMP) continues to evolve as cloud technology evolves and demands for secure services increases. Navigating the FedRAMP process can be challenging, selecting the right partners to assist in the process can result in dramatically reduced timelines and increased audit accuracy.

The Solution - Kratos and ATO on AWS

Kratos has partnered with AWS to offer their unique 3PAO services to all clouds seeking to participate in the ATO on AWS program. ATO on AWS is a partner-driven process that aims to significantly increase the number of future compliance authorizations by reducing the time and costs required for the process. By partnering with ATO on AWS, Kratos is able to offer customers direct engagement and guidance from Kratos compliance specialists and support from expert consulting and technology Kratos consultants.

Customers

Established customer relationships with a proven track record with FedRAMP assessments and advisory services.

The Kratos Advantage – Responsiveness, Resources, and Results

Kratos is strategically and functionally aligned to offer a full range of 3PAO solutions partnered with ATO on AWS. We offer several advantages for cloud customers:

- **Proven experience delivering quality and innovative compliance solutions** in all FedRAMP component areas. We are one of the only 3PAO companies that have navigated the FedRAMP Tailored, Moderate, and High baselines, as well as Department of Defense Cloud Computing Security Requirements Impact Guide Level 4, 5, and 6 authorizations.
- **Worldwide presence with skilled resources** to deliver on task orders. Kratos has a global presence with over 4,000 employees located in 54 offices. Our industry partnerships with large and small contractors enable us to deliver on the most critical requirements.
- **Strong focus on compliance automation.** Kratos bolsters the expertise and skills of our consultants with customized automation to deliver innovative and effective solutions. We meet or exceed contract requirements by providing unique automation to reduce timelines and drive down costs
- **Committed to promoting cloud security** through our assessment and advisory services to ensure our commercial customers are aware of the most secure and effective method of building cloud services.
